

Stretching

- 1) Stand with both legs straight one in front of the other as if taking a step.
- 2) Bend the knee as far forward as you can in front of the toe without lifting the heel, holding the Achilles stretch for approx. 10 sec.
- 3) Return to the start position and repeat the sequence 10 times

Isometric Strengthening

On a stationary exercise bike with a foot pedal strap, contract the toes of the affected foot in a claw like grip. Pull up against the strap with the top of your foot, lifting the pedal all the way up, then push down and repeat. Rest the other foot on the floor, or the other pedal. Start on a low resistance level.

Pedal for min.

Massage

- 1) In a seated position place a golf ball under the middle of the instep.
- 2) Pushing firmly down on to the golf ball with the instep, move the foot over the ball backwards and forwards for about five minutes.
